

I am writing to express my concerns regarding the expansion of Low Power FM stations. I am concerned that the process will allow LPFMs to take priority over current FM services. I listen continually to K-LOVE which I receive from an FM translator. I suffer from chronic depression and this radio station is an integral part of my life. It provides encouragement, hope, and comfort. I am only one of thousands who listen to this station locally. To allow this service to be displaced would leave this community without a means of listening to anything positive. Whether you are religious or not, this station provides hope and encouragement for millions of people. K-love provides free support and encouragement to people who are desperately trying to turn their lives around. No other radio station in this area does that. Please do not expand LPFMs in a way that would allow them to take priority over local translators.
